STUN GUN  
"KONVOY X2"

# POLICE STUN GUN "KONVOY X2"

## PURPOSE

Electroshock device KONVOY X2 (stun gun KONVOY K.AAA) is a powerful dual-core contact electroshock weapon equipped with a built-in flashlight and providing maximum safe electrical characteristics for use against biological objects with a series of high-voltage electric current discharges.

KONVOY X2 is designed for professional use by police officers.

The dual-core converter technology allows generating efficient high-voltage pulses. KONVOY X2 is a special tool for controlling the behavior of the offender, which allows stopping the offense in a short time.

The electrical parameters of the stun gun KONVOY X2 are safe for the life and health of the affected object, do not cause a fatal outcome or irreversible pathological changes in the body of the affected object, when following the rules of operation and use.

## TECHNICAL PARAMETERS

Device class according to OST 78.01.0009-2002:	A
Climate conditions operates in temperature range from -20 °C to +50 °C and relative humidity up to 98% at +25°C	
Weight, kg	0,3
Dimensions Length-x-Height-x-Width (without the length of electrodes), mm	165 x 61 x 29
Length of the combat electrodes	9
Distance between combat electrodes, mm	40
Cycles of operation with a fully charged battery	80
Battery rechargeable LiPOL accumulator battery	11,1V / 600 mAh
Charging cycles of the battery, not less than	500

# POLICE STUN GUN "KONVOY X2"

## DESIGN FEATURES

KONVOY X2 is structurally made in a shock-resistant case and has a three-position fuse, a battery charge level indicator, control- and pointed combat electrodes, an integrated flashlight located in the handle, an eyelet for the wrist strap, an anti-slip silicone discharge button and a socket for charging the battery. The combat electrodes are made of duralumin and anodized with a durable black coating. The side surfaces of the handle have an anti-slip texture for a confident grip.

### **Protective cover of the combat electrodes.**

The standard set includes a protective cover for the sharp combat electrodes. The cover allows carrying the stun gun without a holster. When KONVOY is used in the drive-stun mode, the cover should be removed.

### **LiPOL accumulator battery (11.1V/600 mAh).**

Stun gun KONVOY X2 has a powerful built-in lithium polymer battery. The charging jack is located on the side of the device and is covered with a silicone plug.

## OPERATION

Stun gun KONVOY X2 is a compact and lightweight stun gun to be carried on the daily basis by police officers. The standard set includes a plastic holster with a Tek-lok mount, which provides quick access to the device.

The battery discharges by 3-10% per month. Therefore, when not using the stun gun actively, it is recommended to recharge the battery once every four months.

The stun gun is has a three-position safety fuse. The fuse is turned on in the middle position:

- 1) Shifting the fuse slider to the left turns the safety off. At the same time, the LED indicator displays the battery charge level.
- 2) Shifting the fuse slider to the right turns on the built-in LED flashlight.

The pointed combat electrodes make it possible to effectively transmit the electroshock discharge to the target that's wearing thick winter or leather clothing.

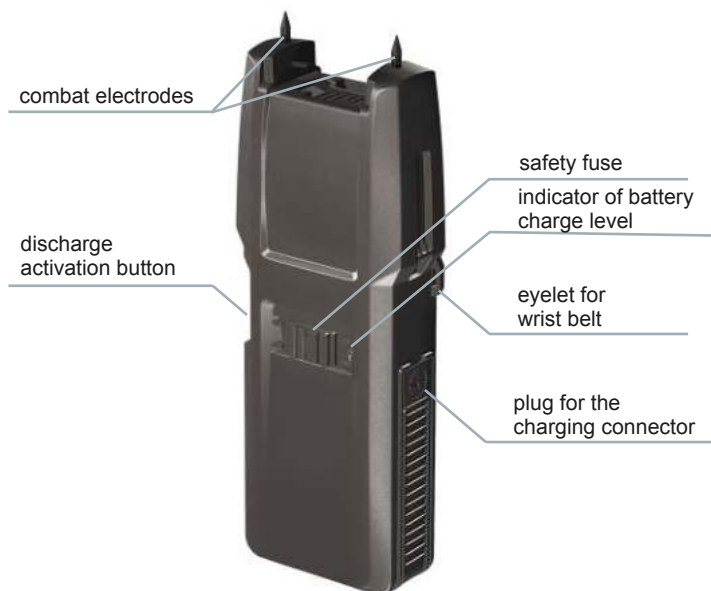

## FEATURES OF COMBAT CONTACT USE

Stun gun KONVOY X2 affects the nervous system of the object with high-voltage electrical impulses that cause the neuromuscular blockade. Neuromuscular blockade interferes with sensory and motor nerves, and is effective for offenders with a high pain threshold (drug users who are under severe stress, prepared or trained opponents). The electroshock influence of the stun gun allows controlling the actions of the offender, depriving him of the opportunity to consciously interrupt the impact or resist during the use of weapons.

## POSITIONING OF THE CONTROLS

## STANDARD SET

- Stun gun KONVOY X2;
- Automatic charger;
- Plastic holster;
- Protective cover of electrodes;
- Wrist strap (reinforced);
- User's manual;
- Packaging;
- Technical passport of the device, warranty card.

## ABOUT OUR COMPANY

ZAO OBERON-ALPHA is a licensed developer and producer of weapons.

The company specializes in development, production and sale of class A special equipment for the police, as well as civilian electric self-defense weapons - powerful Class 1 electroshock devices.

### **OBERON-ALPHA provides:**

- Development and production of Class A electroshock devices for police and legal entities with special statutory tasks.
- Development of police special equipment (including made to order).
- Development and production of civilian stun guns.
- Development and installation of protective high-voltage barriers.
- Production of colour smoke cartridges.
- Engineering services and design of devices of any complexity to order.
